# Nagaland divided over Ravi's stand

Apex tribal body wants him to stay on

SPECIAL CORRESPONDENT  
GUWAHATI

Traditional tribal groups in Nagaland and some extremist groups do not appear to be on the same page as the Isak-Muivah faction of the National Socialist Council of Nagaland, or NSCN (IM) over Governor R.N. Ravi's continuation as the interlocutor for the ongoing peace talks.

The NSCN (I-M) calls itself the National Socialist Council of Nagalim. While Nagaland has a territorial limit, Nagalim refers to all Naga-inhabited areas in the Northeast as well as the adjoining Myanmar.

The Naga Hoho, the apex body of 14 tribes and the Lotha (tribe) Hoho, on Tuesday said in separate statements that replacing Mr. Ravi would "delay the peace process and lead to endless negotiation while remaining in one's comfort zone at the cost of peace and tranquillity".

They said "this is not the

coincided with a statement issued by the NSCN (I-M) accusing Mr. Ravi of creating hurdles in the final settlement of the Naga political issue and justifying the demand for his removal as the interlocutor.

"The peace process is in a state of simmering tension and reaching tipping point because of Mr. R.N. Ravi's vitriolic attack on the Naga issue" that Mr. Modi had entrusted with for "an honourable and acceptable" solution, the NSCN (IM) said.

Mars is on the blue orbit, and Jupiter is on the brown orbit. The space between the orbits is filled with small red and green dots representing the asteroid belt. # What is a Dwarf Planet?

Dwarf planets are round in shape and orbit the Sun just like the eight major planets. But unlike planets, dwarf planets are not able to clear their orbital path so there are no similar objects at roughly the same distance from the Sun. A dwarf planet is much smaller than a planet (smaller even than Earth's moon), but it is not a moon. The first five recognized dwarf planets are Ceres, Pluto, Eris, Makemake and Haumea and they are all uniquely mysterious.
