Edneer Math seer passes away at 80

He was a promoter of Yakshagana

SPECIAL CORRESPONDENT
MANGALURU

Kesavananda Bharati Swamiji, seer of the Edneer Math in Kasaragod district of Kerala and petitioner in the landmark judgment of the Supreme Court on Fundamental Rights, passed away in the math in the early hours of Sunday.

He was 80.

Soon after completion of his 60th Chaturmasya programme in the math on September 1, the seer was admitted for a couple of days at a private hospital in Mangaluru after he had cardiac and breathing problems. On Saturday, he performed puja at the math and slept after having fruits.

The last rites of the Swamiji were performed on the math's premises in the presence of a large number of devotees on Sunday.

The seer, known as Sri-mad Jagadguru Sri Sri Sankaracharya Thotakacharya Kesavananda Bharati Sripadaganlavaru, was the head of the math since 1961.

A proponent of Advaita philosophy, the seer belonged to the lineage of Thotakacharya, one of the first four disciples of reformer Adi Sankaracharya.

The Swamiji was a good singer and a popular 'Bhaga-

vata' (singer and director) in Yakshagana, where he rendered compositions in the Carnatic music style. He promoted a Yakshagana Mela for nearly 15 years, and this troupe performed programmes in Karnataka and Kerala.

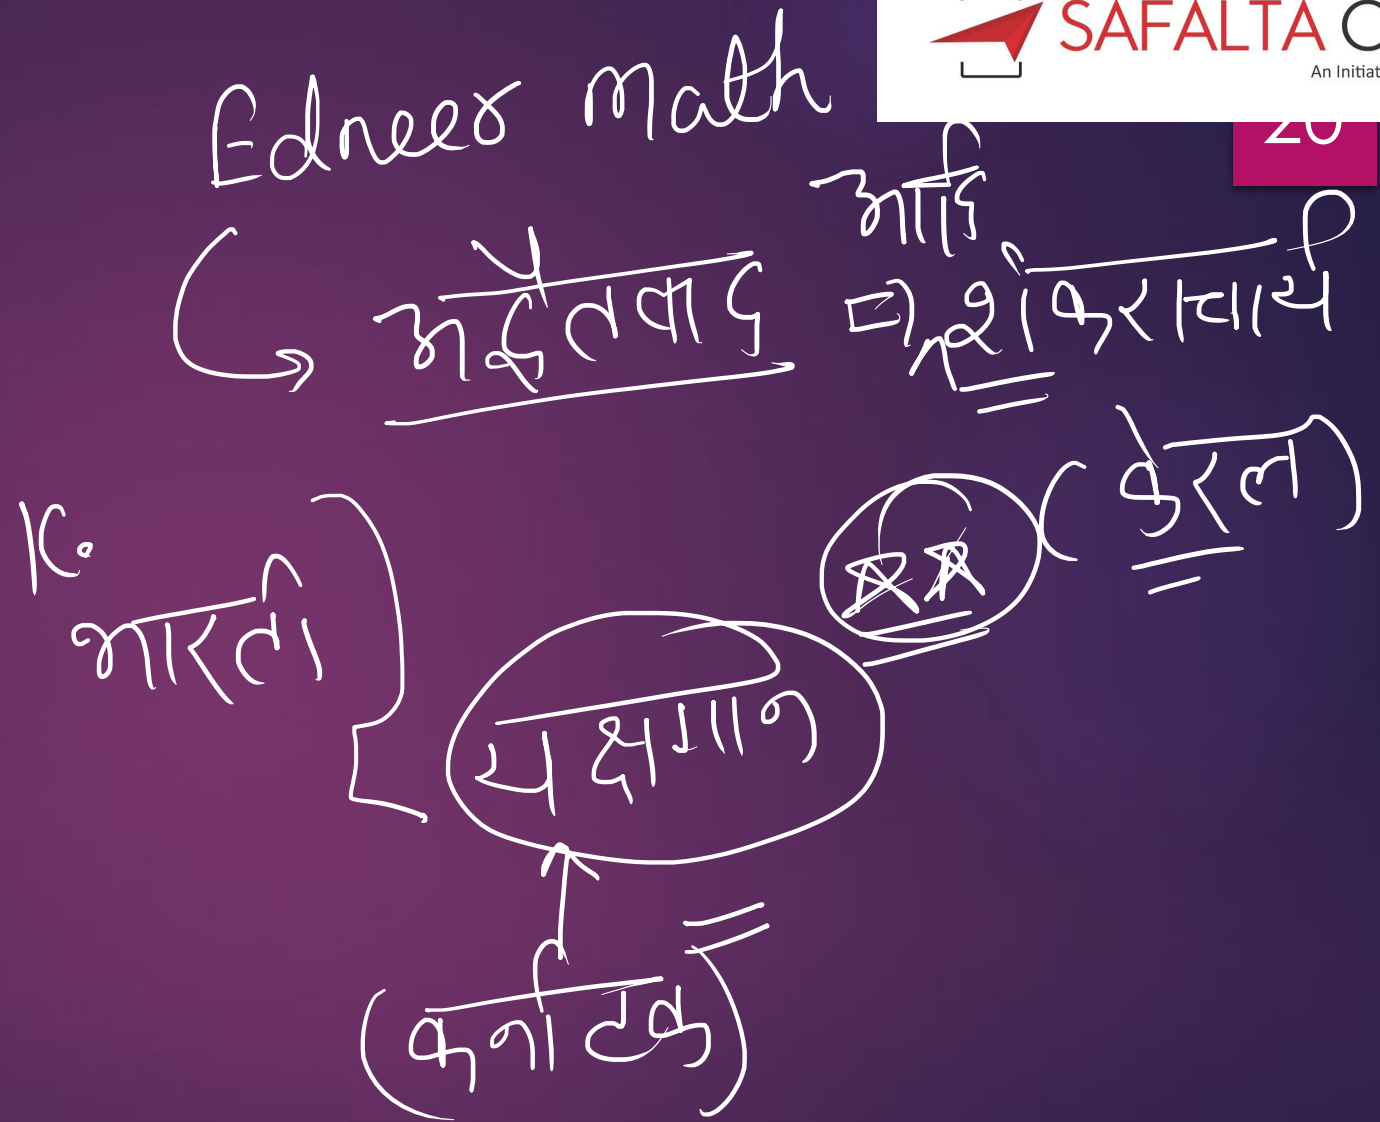

"His patronage removed the inhibition with Yakshagana artists and brought them to prominence," said T. Sham Bhatt, former Karnataka Public Service Commission Chairman and a devotee.

It also made other religious heads extend patronage to it, Mr. Bhatt said. The Swamiji conducted annual Yakshagana *Saptaha* (week-long Yakshagana shows) and Yakshagana *Talamaddale* programmes at the math. On September 1, he was the Bhagavata in a 'Talamaddale' programme.

The Swamiji was a strong proponent of Kannada in Kasaragod and lent his support to Kannada activists.

Prime Minister Narendra Modi remembered him for his community service and empowering the downtrodden. In a tweet, Mr. Modi said the spiritual leader was deeply attached to India's rich culture and great Constitution.

Germany threatens Russia with sanctions

Britain says Russia has 'very serious questions to answer' and that it was 'clear' Navalny was poisoned

AGENCE FRANCE-PRESSE
BERLIN

Tensions deepened between Germany and Russia over the alleged poisoning of opposition figure Alexei Navalny on Sunday, with Germany threatening sanctions and Russia accusing Berlin of delaying the investigation it demanded.

The Russian opposition leader and anti-corruption campaigner fell ill on a flight last month and was treated in a Siberian hospital before being evacuated to Berlin.

Germany said last week there was "unequivocal evidence" that President Vladimir Putin's top foe had been poisoned using the Soviet-era nerve agent Novichok.

Germany will discuss possible sanctions against Russia if the Kremlin does not

provide an explanation soon, Foreign Minister Heiko Maas said on Sunday.

"We have high expectations of the Russian government to solve this serious crime," Mr. Maas told German daily *Bild*. "If the government has nothing to do with the attack, then it is in its own interest to back this up with facts."

'Russis needs to clarify'

If Russia does not help clarify what happened "in the coming days", Germany will be compelled to "discuss a response with our allies," Mr. Maas said.

Any sanctions decided should be "targeted", he added.

Britain said on Sunday that Russia had "a very serious set of questions to

Heiko Maas

answer" and it was "clear" the Kremlin critic was poisoned with Novichok.

The Kremlin has denied responsibility for the attack and Foreign Minister Sergei Lavrov has said that Germany is yet to share any findings with Moscow's prosecutors.

Foreign ministry spokeswoman Maria Zakharova on

Sunday accused Germany of stalling efforts to probe the case.

German authorities had failed to respond to a request by Russian prosecutors sent on August 27, she said in a Facebook post.

"Dear Mr. Maas, if the German government is sincere in its statements then it should be interested in preparing a response to a request of the Russian Prosecutor General's Office as soon as possible," Ms. Zakharova said.

'Double game'

"So far we are not certain that Germany is not playing a double game," she added. "Where is the 'urgency' you are insisting upon?"

"By not sending its answer, Berlin is stalling the pro-

cess of investigation for which it's calling. On purpose?"

Mr. Maas said on Sunday there were "several indications" that Russia was behind the poisoning, in the strongest accusations yet from Germany. "The deadly substance with which Navalny was poisoned has in the past been found in the hands of Russian authorities."

On the subject of which sanctions could be discussed by the EU, Maas did not rule out action relating to Nord Stream 2, a multi-billion-euro Russian-German gas pipeline nearing completion that has drawn the ire of US and European partners alike.

"I hope... that the Russians do not force us to change our position on Nord Stream," Mr. Maas said.

WHAT ARE NOVICHOK NERVE AGENTS?

WHAT ARE NOVICHOK AGENTS?

Novichok agents are organophosphate nerve agents. They were reportedly developed in Russia from the 1970s onwards. Novichok agents are supposedly 5 to 8 times more deadly than VX, another deadly nerve agent.

1970s–1990s

VX

median lethal dose
10
milligrams per person
(skin exposure)

Novichok agents can be delivered as a liquid, fine powder, or gas. It has been claimed that safer precursors can be mixed to make them on demand, though this has been refuted by other sources.

POTENTIAL STRUCTURES OF NOVICHOK AGENTS

Exact structures of Novichok agents are unknown. The structures above are those suggested by Vil Mirzayanov, the Russian chemical weapons scientist who exposed their development. Nerve agent exposure is usually treated with atropine and pralidoxime.
